

**Push To Pull**

**a.k.a**

**Interim Support Material  
Management & Tracking  
(ISMMT)**

# DEFINITION OF PUSH MATERIAL

---

- ◆ Push material is:
  - **Material handed-over (pushed) to the ship or SUPSHIP in support of a new installation or upgrade.**

- ◆ Push material includes:

MAMs

SRI\*

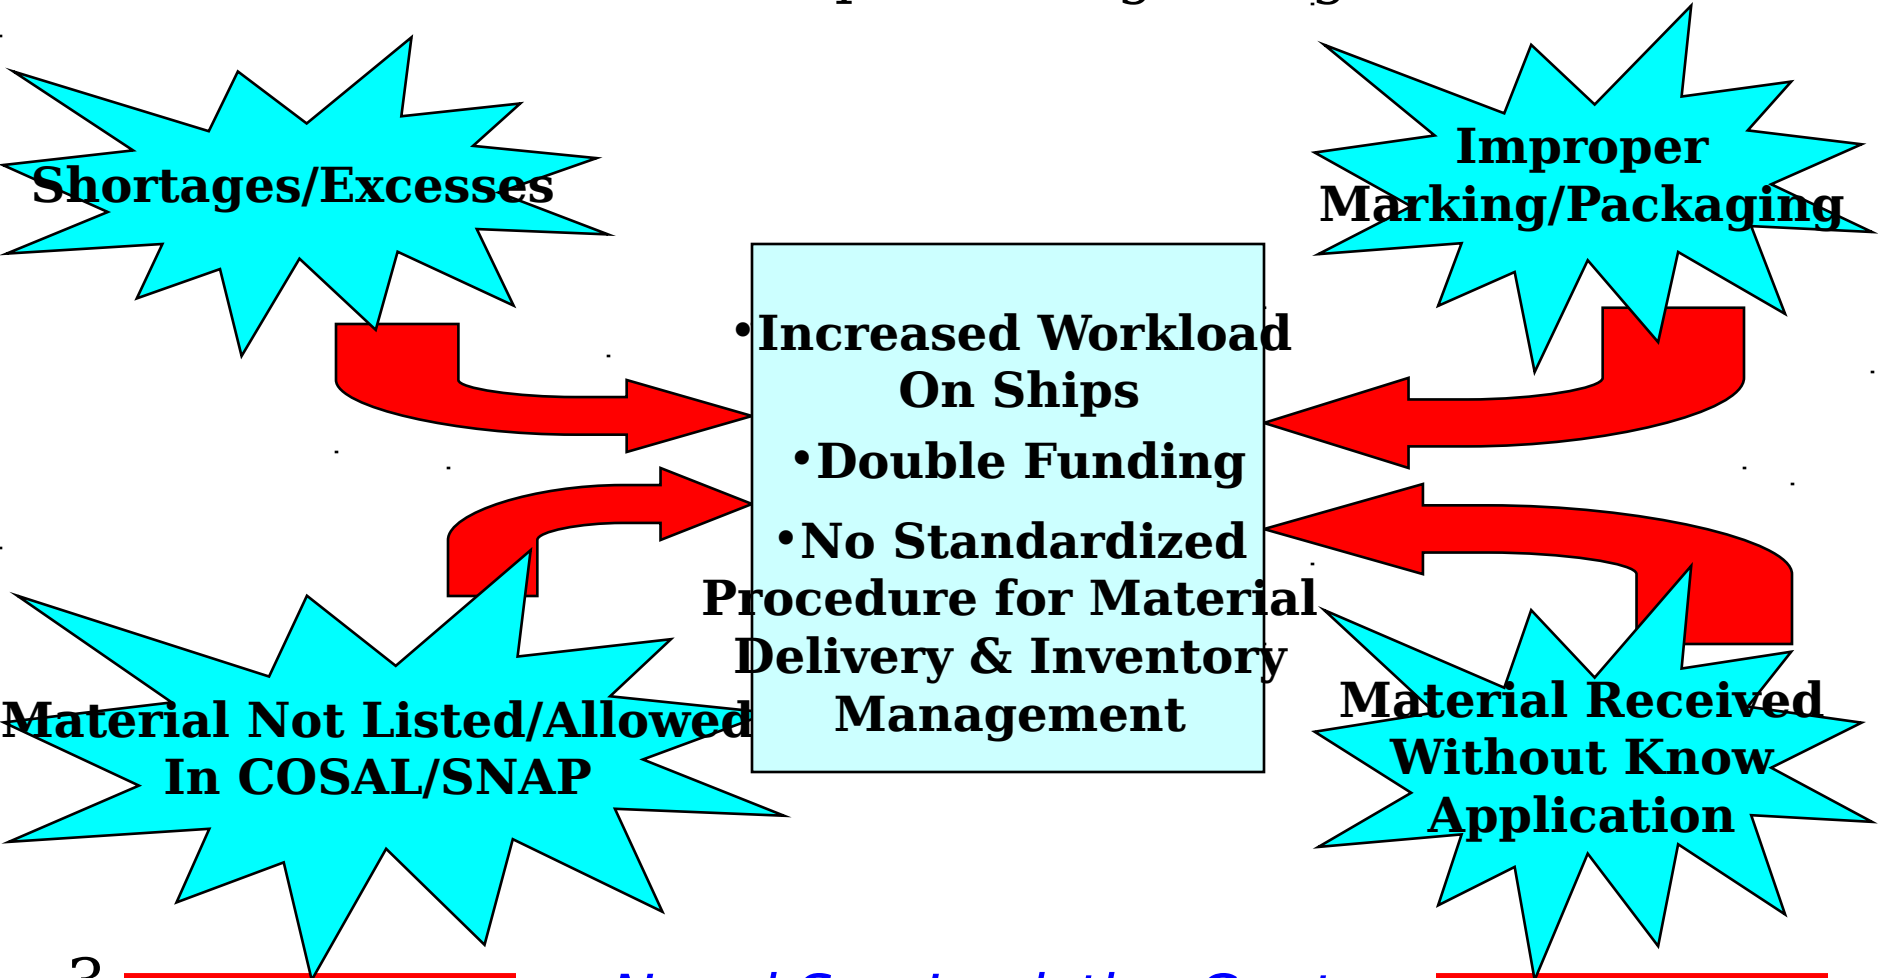

OSI\*

- ◆ The program now encompasses
  - **All Operational ships in CNO-Scheduled Availabilities and all New Construction ships**

\*Spare and repair parts required to support a new installation prior to Material Support Date (MSD)

# BACKGROUND

- ◆ Numerous Fleet complaints regarding Push material

# OBJECTIVES

---

## Push To Pull Program (Interim Support Material Management & Tracking)

**Uncontrolled Pushing of Interim Supported Material  
To ships, SUPSHIP or Installing Activity**

**"Pull" material using ship/SUPSHIP requisitioning  
from NAVSEA Staging Facility**

**Material required to support new installations  
correctly reflected in SNAP/COSAL**

**Reduce/Reutilize residual material**

**Standardize & centralize management control**

**Streamline the process of handling Push Material invisible  
To The Fleet**

# NSLC FUNCTIONS

---

- Allowance validation of Push material
- Allowance discrepancy correspondence and tracking
- Requisition processing
- Validate/cancel MAM requisitions for material not due-in
- Expediting - tracking and follow-up of due-in material
- Provide information/assistance to SPMs/ships/SUPSHIPS
- Disposition of residual material
- Program coordination/oversight

# VALUE ADDED BY NSLC

---

- **Ship/SUPSHIP gets correct material (in response to a**
- **COSAL/SNAP are corrected/validated**

NAVSEALOGCEN

- **Removes workload burden from ships/SUPSHIPS**
- **Single POC for Interim Supported Material issues and**
- **Provides audit trail for material provided to the ships**
- **Material delivery & requisition information provided**
- **Push Material Inventory Control System (PMICS) available**
- **Decreased demand on NAVSEA 04L Outfitting Account**
  - **\$13.6 million in cost avoidance in FY03**
- **Residual Material captured/reutilized**

# VALUE ADDED BY NSLC

## (Cont.)

---

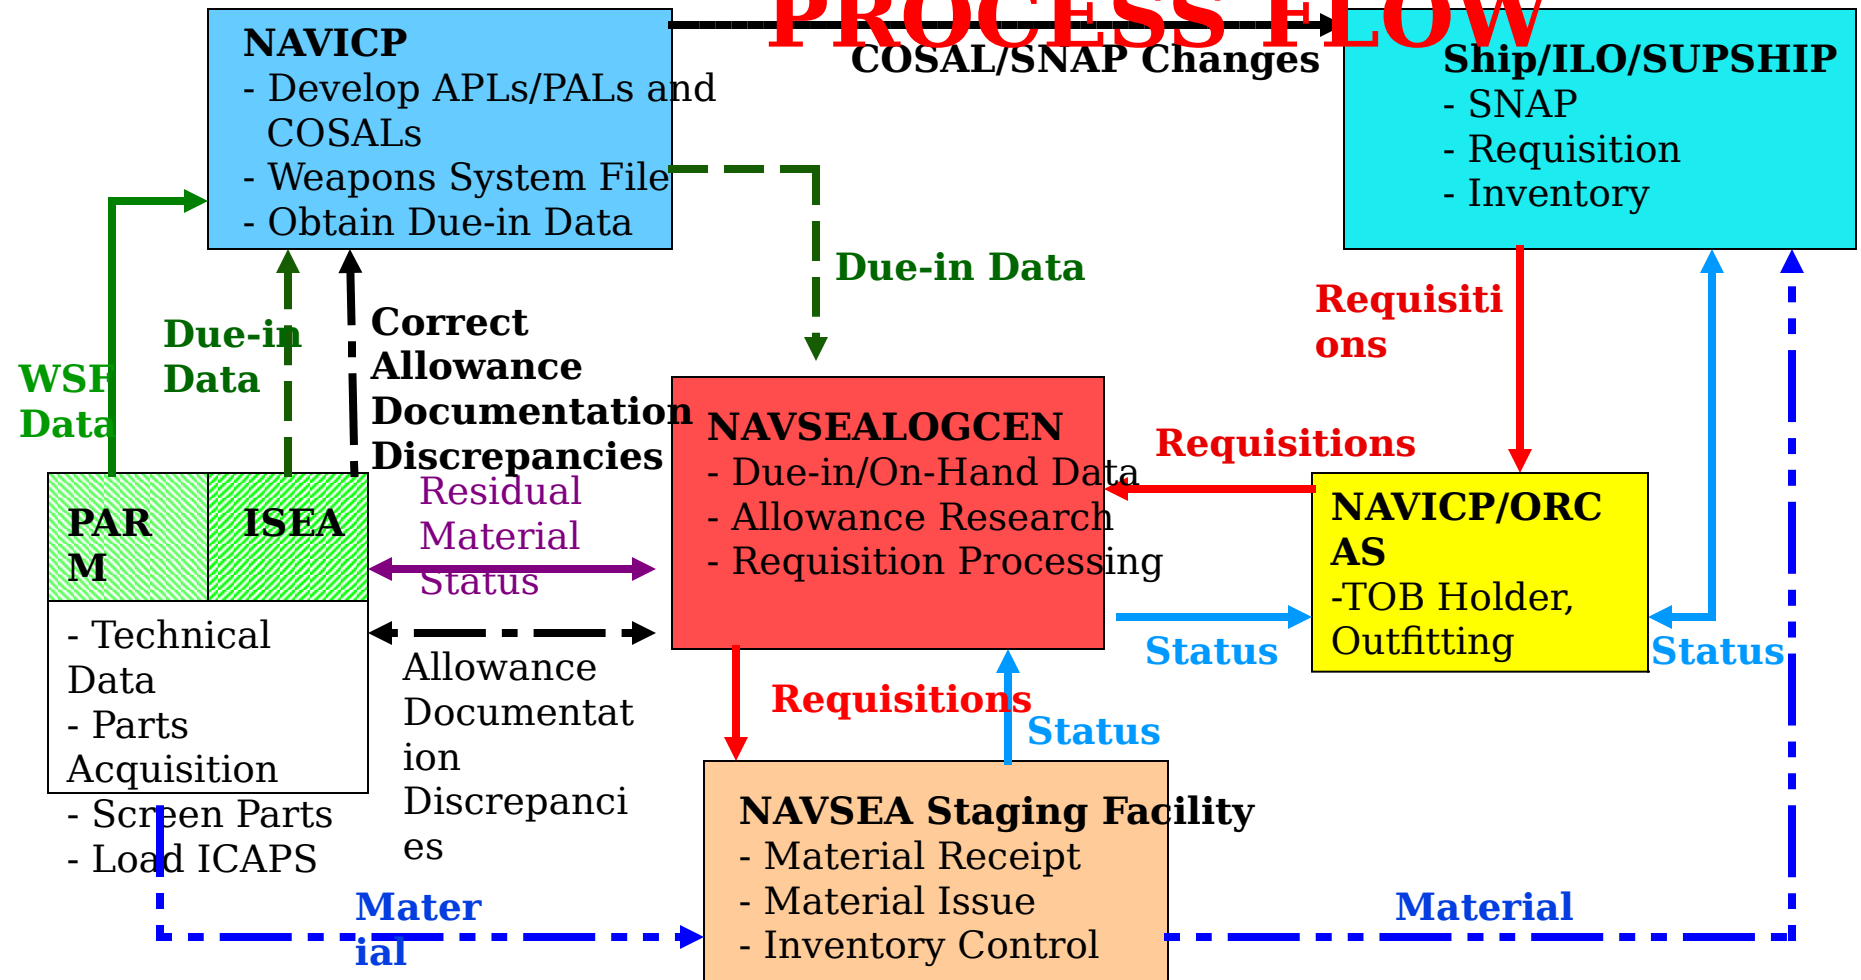

### ➤ ISEA/PARMs:

- **Verify material receipt and maintain history of delivery - information retained in PMICS for future inquiries**
- **PMICS is available via NDE**
- **Allowance documents reviewed and potential discrepancies identified**
  - **PARMs/ISEAs made aware of possible problems with ships' ability to requisition required material and equipments**
